

Resident Instruction Sheet

Your Habersham community has been equipped with a DoorKing Telephone Entry System that will provide communication for your guest(s) from the gated entrance to your condo by use of the local telephone network. If you have any questions regarding the use or operation of this system, please contact any board member or ask your question via return e-mail. We will respond in a timely manner.

Guest Communication

Your name has been programmed into the telephone entry system. When a guest comes to visit you, they will look your name up in the electronic directory. When your name is displayed in the directory, the guest can press the CALL button to establish communication with your home.

Granting or Denying Access

Once you have answered the phone call and you have identified your guest, you have the choice to either grant access or deny access to your guest.

To grant access to your guest, press 9 on your touch-tone telephone. The telephone entry system will respond with a confirmation tone indicating that the gate is opening and will automatically disconnect itself. Some newer telephones emit a very short duration tone when the number is pressed. If your telephone does this, you may have to press the 9 twice in rapid succession to open the gate. To deny access to your guest, press the # key and hang up.

Call Waiting

If you are on the telephone when a guest tries to contact you from the telephone entry system, they will hear a busy signal and will have to wait for you to end your call before they can contact you. To eliminate this problem, you can order call waiting from your local telephone company.

Privacy

If you do not want your name and/or unit number listed in the electronic directory, inform any board member or send your request via e-mail. Your telephone number can be stored in the system without your name being displayed in the directory. If you choose this option, you will need to inform your guest of your directory code which we will furnish you later, otherwise they will have no method of contacting you from the entry gate through the telephone entry system.

Access Code

Your system is also equipped with an access code that will allow you to open the gate by entering this code on the system keypad. If you have given us your access code it is already stored in the system. To use the access code, first press the # key, and then enter the four digit code. The gate will then open.

Remote Control

If you purchased a remote the gate will open with a button press. Exit gate will open as you approach the gate.

1835 PC PROGRAMMABLE TELEPHONE ENTRY SYSTEM

flush mount
shown with trim ring -
sold separately

surface mount

wall mount

big characters
half inch LCD display

stainless steel
plate and anti-vandal features
protects all internal parts
